Introduction

Welcome to FunContact, the easiest solution to manage your contacts. This application allows you to manage your contact list in different convenient ways just with a flick of a finger. We hope you'll enjoy using FunContact as we do our best to provide you with the best solutions for your mobile lifestyle.

Requirements

Windows Mobile Classic (Pocket PC) 5.0/6.0/6.1

Windows Mobile Professional (Pocket PC Phone Edition) 5.0/6.0/6.1

Activation

Downloadable version of **FunContact** is fully functional and has to be purchased and activated for further usage after 14-day trial period. Please purchase **FunContact** at www.vitotechnology.com

To activate:

connect your device to Internet+

start **FunContact**

go Menu > About > Activate

type in your activation code from the e-mail you received from VITO after purchasing **FunContact** and press Activate now.

In case you can't connect to Internet from your pocket PC, activation will take more time:

- start **FunContact**
- go **Menu >About> Activate**
- press Activate button, type into the empty field the activation code from the email you received from VITO Technology after purchasing **FunContact**, choose “**I have no Internet**” and press Activate button below. The file “**send_to_support.txt**” was saved to “\Program files\VITO\FunContact\License\” folder.

Please finish activation in the Support section <http://vitotechnology.com/en/support/>.

On this page choose **off-line registration** in combo box to proceed with the off-line activation of your software.

To activate the program off-line make the following steps:

1. Press the button **Choose** and choose file **send_to_support.txt** that was created by the program
2. Having chosen the file press the button **Get License** and save the file with the license
3. Put the file with your license in the folder where the file **send_to_support.txt** is
4. Make sure that:
the file with the license was named exactly as **license_1.0.txt**
the file is saved in Unicode format

Note: as you can see on-line activation is much easier than the off-line variant, which can take considerably more time. We recommend you on-line activation.

The e-mails with activation codes are generated automatically, so if you didn't get the key, check your Spam Filters. Usually when you do not receive the key immediately the letter is put in junk. If you have any questions or problems regarding the activation process, please contact our support at <http://vitotechnology.com/en/support/>.

Create a Contact

To create a new contact:

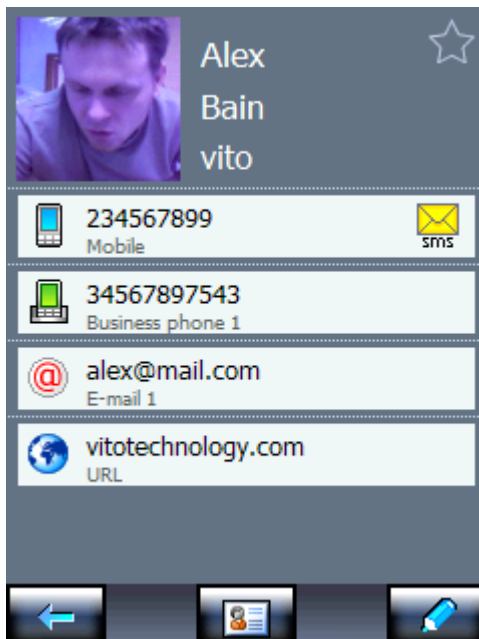

- start FunContact from **Start > Programs > FunContact**, tap the rightmost onscreen button in the bottom bar  and choose **New Contact**
- having filled in all necessary fields, press ok to save the contact.

To move to default Windows Mobile contacts

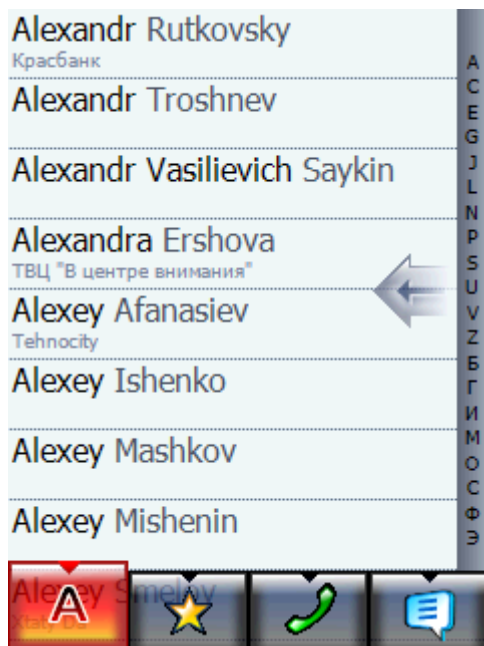

press .

View contacts

You can view your contacts in three different modes. They are:

Contact List

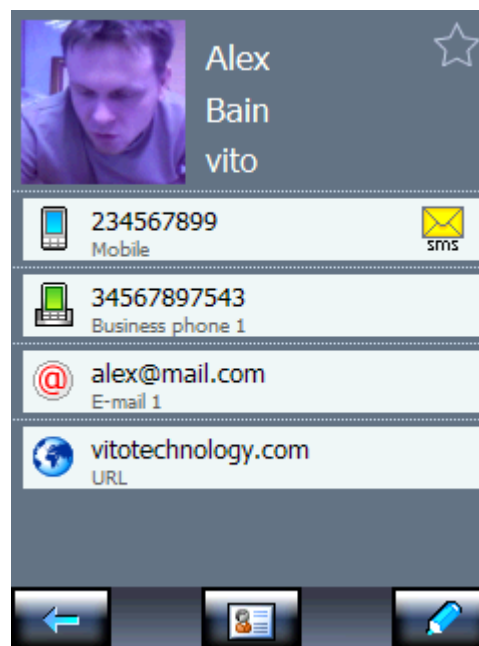

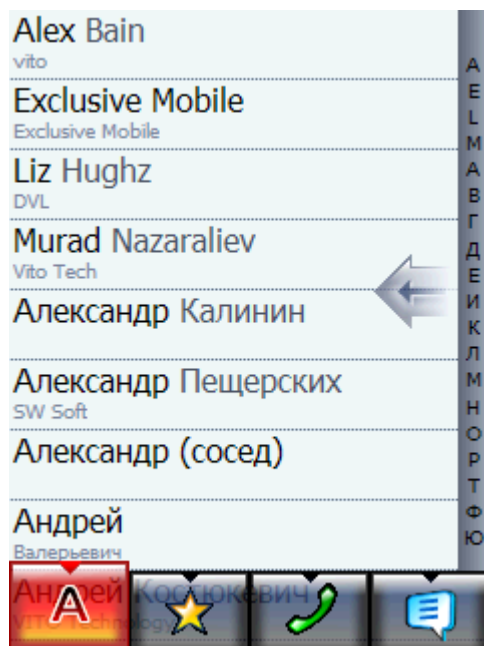

You can switch to this mode by tapping the leftmost

button in the bottom bar. This list contains all your contacts which are sorted in alphabetic order by the first name, last name or company. You may scroll the list with a finger. If you scroll the letters in the right bar of the screen you may quickly switch between contacts starting with an appropriate letter. The letters shown rightwards are the letters that most contacts start with. Choose the contact, then make a call, or send SMS, or do whatever you need.

Favorites

To enter Favorites tap an icon with an image of a star . And you will see a list with your favorite contacts.

To add a contact to Favorites you need to enter a contact card of a person and tap a star in the right corner of the screen.

Phone Call History

To enter phone call history you are to tap an icon with a

telephone receiver

The calls in call history are now grouped by the type of calls (missed, incoming or outgoing calls) and by the date. All types of calls are grouped separately for each day.

To add new phone number from call log, tap ,  or . There will appear context menu with the following choices:

Create new contact

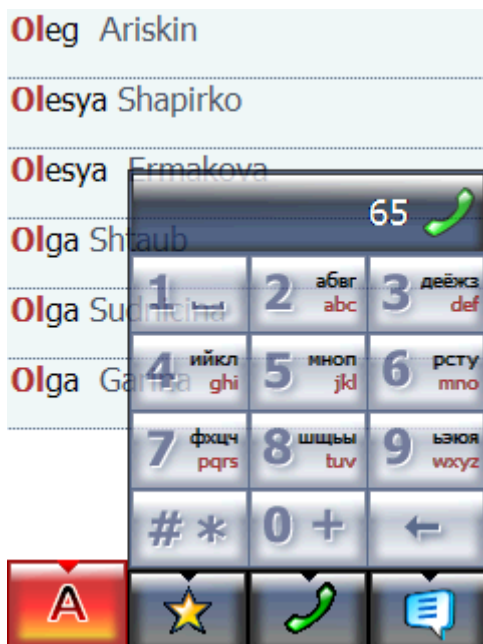

Add to existing

Send SMS

Cancel

Search of the Contact

If you need to find a contact out of the huge number of contacts you may do it differently.

Firstly, you can do it by scrolling the letters in the right bar of the screen. You may quickly switch between contacts starting with an appropriate letter. The letters shown rightwards are the letters that most contacts start with

Secondly, you may tap a grey arrow rightwards the screen to make the keypad visible. Tap the necessary letters and numbers to use T9 contacts look up and in few secs to find the necessary contact. Or you may dial the number that is missing in your contact list. If you dialed the wrong letters and numbers then press backspace arrow to erase it, if you tap-and-hold backspace button your number will be quickly erased. If you want to close the keypad you should press an arrow that appears instead of the backspace button when all symbols in the

input field are erased.

Additional Options

To sort the contacts by **name, last name or company**:

Go **Menu > Sort > Name (or Last name, company)**

To change interface language:

go **Menu > Language**

To add a contact:

go **Menu > New contact**
